

EASILY MANAGE RACGP ACCREDITATION

The new LOGIQC Accreditation Module significantly reduces the time and effort required to maintain your accreditation with the RACGP Standards.

The LOGIQC quality management system now includes an Accreditation Module to make it easy to prepare for and maintain accreditation.

The time involved in preparing for external audits and the stress of compliance can come at a real cost to a business.

LOGIQC's Accreditation Module integrates with other registers making it easy to generate a report on how well you meet standards and what needs to be done before your next audit.

Designed specifically for healthcare services, the Accreditation Module comes pre-loaded with the RACGP Standards to save time on setup work.

Here are some examples of how LOGIQC QMS links with the RACGP Standards:

<p>Criterion 3.1.1 Quality improvement Our practice participates in quality improvement activities</p>	<p>LOGIQC QMS includes a fully integrated continual improvement register that allows all staff to identify issues and contribute ideas for improvement.</p>
<p>Criterion 3.1.2 Clinical risk management systems Our practice has clinical risk management systems to enhance the quality and safety of our patient care</p>	<p>LOGIQC QMS includes a risk management module to support tracking and management of key risks. The risk module automatically tracks related incidents and sends notifications when risks are occurring.</p>
<p>Criterion 3.22 Qualifications of clinical staff Members of our clinical team are appropriately qualified and trained, have relevant current Australian registration and participate in continuing professional development</p>	<p>LOGIQC QMS includes a licensing register for scheduling and tracking credential checks and a training register for scheduling and tracking training requirements. Both registers allow for uploading and filing of documentary evidence, such as certificates.</p>
<p>Criterion 4.1.1 Human resource system Our practice supports effective human resource management</p>	<p>LOGIQC QMS includes a contract register for filing and tracking of employment contracts and associated HR documents. Tasks, such as annual performance appraisals, can be scheduled and linked to a contract.</p>

KEY FEATURES LOGIQC ACCREDITATION MODULE

- Conduct a self-assessment against the RACGP Standards and generate an action plan.
- Set automatic reminders to prepare for external audits detailing what needs to be done and who needs to be doing it.
- Link your documents to the RACGP Standards making it easy to find policies and procedures relevant to each criterion.
- Link audits and other quality improvement actions to the RACGP Standards.
- Generate an evidence report detailing how your practice complies with each standard to reduce the time required to prepare for your accreditation.
- Give your auditor on-line or on-site access to view your evidence report against each standard.
- Once set up, LOGIQC QMS supports future accreditation processes because the evidence linked to each standard will be automatically updated with the latest versions of documents and recent quality activities.

LOGIQC Quality Management System

The LOGIQC Quality Management System is cloud-based software for managing safety, quality and risk in healthcare practices. It is specifically designed to support practices to meet accreditation requirements and drive improvement.

LOGIQC QMS can be configured to include up to 13 registers to manage business processes for governance, document management, quality, compliance, service improvement and managing adverse events.

Trend reports

LOGIQC provides graphical trend reports on reported incidents and complaints and data can also be exported to Excel.

Data security

LOGIQC is hosted in the 'cloud' in Brisbane and Auckland and with up-time reliability of >99% and data transmission encrypted with SSL technology, LOGIQC meets industry standards for data security.

All data in the system is backed up daily and your practice has complete control over who can access data, records and documents.

Compliance with standards

LOGIQC QMS is designed for compliance with a wide range of quality standards including: RACGP Standards for General Practices, Australian National Safety and Quality Health Service (NSQHS) Standards, ISO 9001 Quality Management Systems; and ISO 31000 Risk Management.

Simple pricing

Build your own solution and only pay for what you need. Starting at \$98 per month for the core system and one licence, your system can be made available in the cloud with full daily backup and access to our friendly helpdesk staff. From there you can build your own system adding just the features and licences that you need.

On-site and on-line training options

Training and system set-up support can be provided online via screen-share, on-site at your premises, or a combination of both.

Support

Included in the monthly subscription fee is full helpdesk support for all users. Our helpdesk is based in Brisbane and 70%+ of enquiries are responded by our staff within the first two business hours.

Key benefits of LOGIQC QMS

- Simplify compliance and save time.** Organise key tasks, documents and reporting processes and get email reminders when things need to be done.
- Control and track risks and hazards.** Identify, monitor and mitigate clinical and business risks and hazards and ensure compliance with legislation.
- One simple system for incident and complaints management.** Staff can easily record issues and notifications are automatically sent to the relevant people.
- Organise and protect key documents.** Ensure your policies, procedures and forms are protected, version controlled and easily accessed by staff.
- Drive improvement.** With the audit and improvement registers you can schedule required audits, get automatic reminders, generate improvement actions and track results.
- Manage accreditation.** Conduct self-assessments against standards, record evidence against criteria, and generate an action plan for improvement actions and track results.
